ENGLISH BRAND

Sylwave Electronics

BASE

Shenzhen, China

WORKING MODEL

Source against your enquiry

Based in Shenzhen and connected to the Huaqiangbei electronics market, we begin with your requirements and look for suitable sourcing options. Availability and commercial terms are confirmed for each enquiry.

Practical support, at each step.

01 Supplier screening

Review source information and available documentation.

02 Part and label checks

Compare proposed goods with the complete ordering code.

03 Actual-goods photographs

Arrange photographs for your review before shipment.

04 Packaging inspection

Check the agreed packaging and label requirements.

05 Third-party testing

Coordinate external testing to an agreed scope.

06 Overseas shipment

Coordinate shipping details for your destination.

Clear requirements. Agreed next steps.

From a single part to a full bill of materials, keep the proposed goods, evidence and order conditions aligned.

01

Share your requirements

Provide complete manufacturer part numbers, quantities, target delivery and any essential packaging, date-code or documentation requirements.

02

Review sourcing options

We screen proposed suppliers and clarify the available goods, photographs and source information. Review the details against your purchasing requirements.

03

Agree before ordering

Confirm specifications, pricing, delivery and acceptance criteria. Where testing is required, agree the provider, methods, sample quantity, fees and timing.

04

Coordinate the shipment

Confirm the agreed checks, packaging, destination and shipping arrangements. Keep the quotation, order details and supporting records for follow-up.

For your next enquiry

- Complete ordering code
- Target delivery
- Required documents
- Quantity per line item
- Packaging and date code
- Alternative-part policy

A sourcing enquiry is not an order confirmation. Availability, documents, inspection arrangements and commercial terms are agreed for the specific order. Alternatives require your technical approval.
